Attachments: Categories of Comments for Ag and Ag related pesticides.docx

Roberta,

Thanks for the discussion. It is good to share thoughts on this whole CZARA issue. Attached is the Categories, at least the latest version.

Alan,

I'm sorry, but I lost the list I had of the 3 letters I was supposed to reread for pesticide comments. I know one was 54. Could you remind me of the other two? Thanks.

Categories

I read quite a few comments on individual management measures and whether or not they really met the (g) guidance. Perhaps CAFOs could be included in a broader category on the MMs.

Are legacy issues incorporated into the restoration heading?

I also read a series of comments on whether or not additional management measures were needed. Would that fit under other legal issues?

Roberta, I've added CAFOs, Enforcement and Voluntary Measures to the categories. See the attached.
